Queen of Heaven Cemetery (QOHC)
Urn Garden
Standard for Burial Plot Configuration

Notes:

1. The Urn Garden plots have a uniformed (or set norm) for the emplacement (burial) of urns containing cremated remains. Since each Urn Garden plot can accommodate up to four (4) individual urns, they are to be buried a minimum of 3 feet below the ground level and placed bottom first into the plot opening (i.e., so that the top of the urn is closest to the ground level (not buried on it’s side)).

2. A standard grave headstone or marker is prescribed for Urn Garden plots.

3. The preferred monument provider for the QOHC is Spencer Monument in Colo Spgs. Sample, available marker/monument stone colors are available later in this section.
